DETAILED ACTION

1. Claims 1 to 28 are presented for examination.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119, which papers have been placed of record in the file.

Allowable Subject Matter

3. Claims 1 to 28 are allowed.
4. The following is an examiner's statement of reasons for allowance: the prior art teaches various decoding methods and decoding apparatus performing low density parity check decoding utilizing a parity check matrix. For instance, Goldstein et al. (USP 6950461 B2) teaches a modem that utilizes low density parity check (LDPC) codes encoding and decoding process wherein a generator matrix and the parity check matrix is used to generate parity bits and Wu et al. (USP 7000177 B1) discloses a parity check matrix forming method and device for a transmission system.

Although, the prior art made of record teaches decoding LDPC codes using parity check matrix and a generator matrix, the prior art made of record fails to teach or fairly suggest the novel element of the instant invention. i.e., the prior art made of record, taken alone or in combination fails to teach or fairly suggest or render obvious the recited limitation of "an R matrix generation unit receiving the first Q matrix from the

first Q matrix generation unit, and by using a first minimum value that is a minimum value among the elements that are not 0 in each row, a second minimum value that is a second minimum value in the same row, and the location of the first minimum value in each row of the first Q matrix, replacing the element that is not 0 in the row with the minimum value, among the remaining elements that are not 0 in the row excluding the value of the element, and generating an R matrix.”

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
